

**Organise.
Communicate. Save time.**
Your smart companion in
everyday day-care.

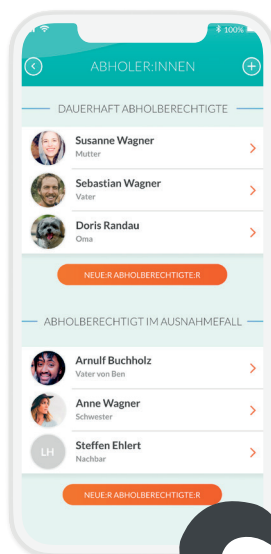

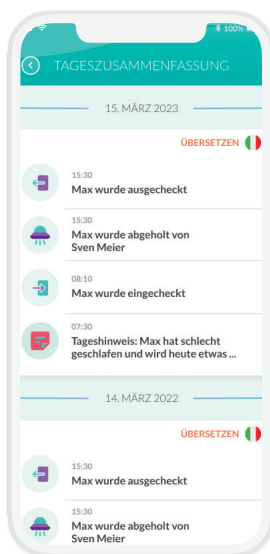

With automatic
translation.

CARE CONNECTS

With the CARE day-care app the focus is on parents and guardians and their child. Whether receiving news and impressions from the day-care centre or interacting with other parents in group chats – CARE makes interaction easier, more efficient and more reliable.

NO TWO DAYS ARE THE SAME

Report absences

The grandparents are coming to visit spontaneously, a cold is coming on, or you are going away on holiday soon? Inform the facility about your child's absence with just a few clicks.

Secure chats

Did you forget to give some information when you dropped off your child? No problem – you can write a quick message on the CARE day-care app afterwards.

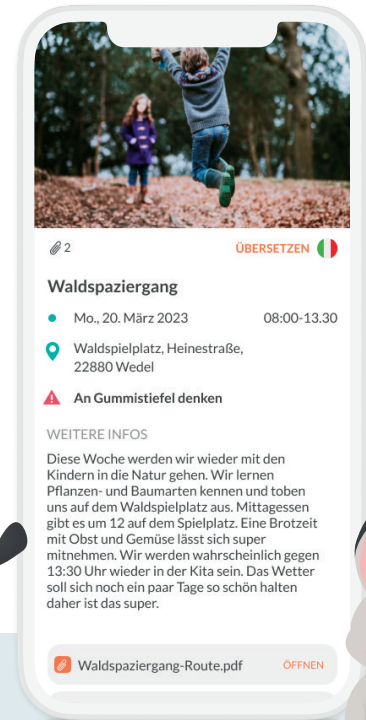

Change pick-up details

Something has come up today? Inform the facility quickly and easily – and let the facility know who will be collecting your child and at what time.

EVERYTHING UNDER CONTROL WITH CARE

Summer festival, closing times and when should the rubber boots be brought, for example?

With the CARE day-care app you can keep track of important dates and information – also for siblings.

COMPLETE SAFETY FOR OUR LOVED ONES

- The highest data protection standard and personal registration procedure
- Ad-free and secure alternative to popular messenger services
- All data is stored securely in Germany
- Communication without disclosing one's mobile phone number
- All information is stored safely and only you have access
- No commercial evaluation and no sale of the data

CARE DAY-CARE APP – YOUR SMART COMPANION
